INTRODUCING
THE FINN MTS
MATERIAL TRANSFER SYSTEM
IT’S TIME TO BURY YOUR SHOVEL.

With the ability to store and deliver a wide variety of materials you’re sure to find endless ways to increase your efficiency and grow your business.

VERSATILITY

Whether it’s soil, aggregate, mulch or any variety of material, moving it is back-breaking work. Especially when you’re using a shovel and wheelbarrow. Let FINN help you bury your shovel. And watch your productivity soar.

QUALITY

With the MTS Material Transfer System, you’ll get the quality and features you’ve come to expect from FINN, a trusted name in contractor grade equipment since 1935.

PRODUCTIVITY

The FINN MTS allows you to quickly and efficiently move bulk materials — completely filling a wheelbarrow in less than 4 seconds. With the MTS you’re sure to see productivity rise. In tests, contractors have been able to move 5 cubic yards of material in less than 40 minutes... a job that would typically take 3-4 hours with the standard “shovel and sweat” method.

Features & Benefits

**Rear Door**
Large, wide-opening rear door and reversible floor design allow for fast unloading of the material – 15 cubic yards in less than 1 minute. You can unload as much or as little material as you choose. Or, use it year round to haul other materials such as paver block, trees and shrubs.

**Ergonomic Controls**
Ergonomic operator controls ensure comfortable, safe operation.

**Reversible Floor and Dual Discharge**
Reversible floor and dual discharge doors allow easy unloading from either side of the unit enhancing accessibility and productivity.

**Engine**
Single 25 HP Kohler engine source powers both the vacuum and transfer system, providing better fuel economy and reduced maintenance over competitive products.

**Tarp System**
Roll-Rite™ Electric Tarp System allows for easy, hands-free covering of the load.
The convenient tool storage box keeps the tools you need on the jobsite organized and easily accessible.

Electronically controlled hydraulics eliminate the need for troublesome chains and belts and ensure peak performance with reduced noise and maintenance.

Aluminum panel construction provides a lightweight unit, while a robust steel trailer chassis ensures maximum durability in a highway-speed rated unit.

The MTS includes a powerful multi-purpose vacuum to quickly clean up everything from leaves to grass clippings – wet or dry.
The MTS can move a large variety of materials including:

- Paver Blocks
- Mulch
- Topsoil
- Aggregate
- Sand
- Compost
- Sod
